Sentry MBA Combolist 500K USA | Sentry MBA Combolist 500K USA As you look at the top Combo list, you can see that combo 2 and 3 are identical. This is very unusual. Ideally, each credential should be unique. There are five different domains from which I am sending the requests. They are: budristnyi.com deysend.com fobility.info gotrii.com mycoreaccount.us Email is my only form of log in to these websites. I am also using a VPN to send the requests. Many times users who send me this information are victims of a phishing attack. They try to login to a fake site where they are tricked to click on a link to a site of bad actors where they are hit with credential phishing. Sentry MBA Combolist 500K USA As you can see from the second Combo above, I have already reset the attacked page. This is very important. I have no interest in having someone submit a credential and then have that credential used before it is reset. I reset the page to random values again and again. I am sending this information to you because I am trying to generate a report on the usage of credentials out there in the world. My last report that I sent to you is still valid and I have not updated it. I had a few issues and had to restart the report after the reset. I did not think this would occur, however. I do not know how the site owners are protecting their logins. You need to evaluate the site before you run the report. Some sites have an API. I need to investigate how it works. But I do not have that API for this report. If you do not investigate the target site, you will get incorrect results. I do not want to give a false impression to you. Some sites have filters, reputation checks, and many other things. Some sites have not done any research on their logins. I try to run as many sites as possible. I am not saying a site is good or bad. I am saying that you have to research the site and understand its security. I am not saying a site is open. Just that they have a method of logging in. I am sorry to be blunt. But this is a very important report and 570a42141b
