Game Description

Ever since I was a kid, I had a thing for fantasy. Mostly sci-fi. I wonder if that's why some people hate that genre. Anyway Magicka is a game where I get to carry on that tradition.

Game Description Videos

- I begin in the ship's cargo hold. Where I go about the task of obtaining a veritable arsenal of weapons and spell components.
- As I progress along the deck and amble across the bow I find more powerups, from a beanbag cannon to a Ferris wheel.
- Once I'm in the captain's cabin I have a few more items to equip. Finally, I go upstairs to the bridge where I see another new look. A pirate ship! Actually, I'm disappointed to see a pirate ship full of gunpowder rather than go to another floor, it's the final bosses!
- After a talk with the captain, we head out to find ourselves a crew which I end up recruiting first the right man then more, the majority of them are already aboard. Sword, axe, shield... what I really want is a broadsword. Also a horn for summoning monsters.
- For now, all I have is the two Swordmonger dudes and their weapons. Nevertheless, I leave them behind to head to the first quest. At first I was a little frustrated, as you should be, by the lack of going straight away to the main goal but in the end it was all good. I'll stop complaining when that happened.

Your contacts, even from other apps, are preserved so you always have the latest contact info - email, social networks, friends list, and more."From the description you can see that the app is no joke; it gives the basic functions to organize your contacts and even supports 3rd-party contacts, plus iOS Social Framework. Unlike other contact managers that only keeps contacts in the local phone book, Contacts also saves contacts from other apps to the local phone book, contacts from different phone numbers and social networks, and even display options for each contact. Survive the Rift is a rogue-lite shoot 'em up with procedurally generated levels, unlockable ships, and plenty of items to make each run unique. Inspired by classic 16-bit era scrolling shooters with modern rogue-lite game mechanics. SHIPS Ships have different starting stats for combat and access to new technology. As you progress through the story, you'll unlock different ships that are stronger and more resistant to damage with new, improved technology. Beginning in the sand, the objective is to progress through 5 war-torn sectors, and complete the story, while shooting some rock monsters along the way. TECH Each sector is procedurally generated with the help of a dynamic tech tree of technology paths and upgrades. Progression is based on unlocking new tech, and scavenging loot for upgrades or consumable items. STAGES Enemies will have different behaviors, attack patterns, and damage resistance. Tightly designed mechanics, art, and level design give each run a unique flavor. KEEP YOUR TRIPLE-ENDER, YO! Early access means we will be adding more features, new stages and enemies, and continuing to refine the art and gameplay. KEY FEATURES - Procedurally generated (and growing!) levels - Fast-paced and fun - Vast arsenal - Open-ended gameplay with unique objectives and rewards - Classic 16-bit sci-fi feel - Ability to play on your phone or tablet The "survive" part of the title isn't that literal. There is a "horde" that attacks you in specific locations and you can be disrupted by several types of enemies at once. However, the "shoot them" part is literal. There are tons of enemies that you have to shoot to progress (and survive). To do that, you have to stay in one place and aim. Not a bad game but rather hard if you are new to the genre. But at the same time this game does have a variety of upgrades and powerups, so if you can get used to the pace and flow of it, you will enjoy it. I really like it and would recommend. It is a bit hard, but the game world is rich and it has a lot of depth, which makes up for the difficulty. There is also a robust tutorial that makes it quite easy to play. The only thing I don't like in the game is the
