WILMINGTON — The alleged victim of a violent overnight attack at Gillette Stadium repeatedly told a 911 operator to "just kill me" after cutting her attacker with a knife, according to a police arrest report. Inhalt ist abgedreht [The third volume of the Japanese art writer Seizaburo Tomita's six-volume series on Japanese arts from the fifteenth to the nineteenth century has been published and translated into English, Art of the Copy (2007). This in turn was preceded by two hardbound volumes, Art of the Model (2005) and Art of the Burial Mound (2006). The first volume of the series offers a comprehensive account of the history of Japanese

painting from the fifteenth to the eighteenth centuries, including a critical, chronological and geographical survey of some of the most important artworks and schools of thought. The second, Art of the Model, focuses on the figurative arts, with chapters on sculpture, painting, ceramics, lacquerware, ink-and-paper art, architecture and applied arts. The third volume deals with figure design, calligraphy, illumination, printing, and ceramics. Of particular interest for the study of the history of graphics are the chapters on the development of the woodblock

print, wood-block, monochrome and colour print, and on Japanese Buddhist art, with its ceramics, painting and calligraphy. Art of the Copy also examines (in Japanese and English) the relationship of Japanese culture to art, philosophy and the arts in the first part of the twentieth century, with an evaluation of the work of the Muromachi period. A more subjective viewpoint on the role of art and aesthetics in postwar Japanese society is also provided. In Art of the Copy, the previous volume, Seizaburo Tomita stresses the reciprocal nature of the

relationship between the arts and ideas throughout the long period under examination. He remarks in the introduction that they can be characterised as a 'two-way exchange', with a few rare instances in which a specific artwork or movement of thought may dominate, but that, in general, ideas about art and aesthetics stimulate creativity in the arts.
