New Gods and New Worlds

A sword is called Excalibur, the power of a god is wielded with the name of the abyss. The most powerful sorcery is their hiding places, the Dark Lands, and the seers that walk the Water Path. The weapons are the swords of the gods that are wielded by men and the hammers that crush the gods. When their accumulated might meets at the core of the world, the forces that control them have the greatest power. The resulting imbalance powers the primal forces of the world and is what governs the Circle of Time. Excalibur is a sword with the power to reflect the light of destiny, but the magic of mankind cannot. It is the all-encompassing mirror of dreams and aspirations, but the blade of destiny only reflects itself as destiny. The crescent moon is an inspiration, the balance between heaven and earth, the moon is the guiding light of the seasons.

The Norse and Greek mythologies are the richly deep framework from which the Tarnished Rebellion deriving its inspiration for the game, while carefully refraining from simply presenting reproductions of ancient Europe mythology; the development concept was to present something new by drawing upon the rich soul of the Japanese and Celtic mythologies, and adding it to the Norse and Greek ones.

The Elden Ring is an extraordinarily magnificent system that gathers all powers. The Elden Rift is formed in the center of the world, a place where the power and necessities of all creatures that endure on the planet come together. This divine power, called the mana, may be engrossed within all beings, but for the most

2. Unique Motion Design to Create a Vivid Story The motion design and character design of the game were developed to reflect the difference between the mythological depictions and the historical timeline by taking into consideration the depiction of the magic and weapons used back in the era of the game. Although, due to the limitations of the game development, the details of the gameplay itself weren't fully unveiled before release. GAMEPLAY As a fantasy role-playing game with light RPG elements, Elden Ring uses a mixture of action and RPG features. The weapons and armor that you use, the magic and skills you learn, and even the character's appearance differ from the classic fantasy role-playing game characters. When you take part in an action battle, there will be RPG elements that will appear. While the game takes part in an action battle, you will be in a visual novel style of conversation with your party members and enemies. While you engage in an action battle, you will be able to learn the capabilities of your party members. There are multiple endings that are possible depending on the characteristics of your characters. Although the basic features of an action RPG game is kept, the fantasy role-playing style of the game is strengthened by using a non-linear plot system. Kensei A man who is self-sacrificing and puts nothing before his duties as an Elden Lord Ushion He wields the power of the Stone of the Elden Ring Kanae He wields the power of the Flame of the Elden Ring Cechul The leader of the Elden Lords Yura-i The country's king who wields the power of the Wind of the Elden Ring Zunheiren The country's king who wields the power of the Water of the Elden Ring Enemies You will meet numerous enemies in the game. While they are not all of the same rank, all of them have high attack power and a wide variety of skills. In addition to action battles, you can also challenge multiple enemy bosses in huge dungeons. These dungeons are broken up into many floors and have complex layouts and design. In action battles, your enemies will be divided into three types. The first is the Foreguards, who are extremely powerful. The second are the Light Warriors, who wield the power of the Blade of the Elden

1. Unrar 2. Install and run ELDEN RING 3. Play. Its been so long since ive been so active in the community. Maybe i'll be here more often now that the saga of Tarnished is over.Anyway, I'm proud to show my work, I think its well done.Happy gaming. I have just released the first public patch for Tarnished Online. It has been released for a week or so but I just released it.Anyways, I hope you can enjoy it. ***** Hello! - I'm proud to announce that our long-awaited Tarnished Online will have a patch, containing : - A change to multiplayer that greatly improves communication issues- Chat change, keyboard commands, and menu system changes that will make easier to use- A new tutorial and improvements- A new character building with more skills and trees- Fixes and updates See you on the links! ***** BEWARE THAT THERE ARE LOTS OF CHANGES TO THE GAME, SOME MAJOR, SOME LITTLE! Title - The first patch for Tarnished Online This is the first public patch for our game. It contains : - A new tutorial with mini-tutorials about various topics, including but not limited to : how to play, crafting, etc. - Better access to the crafting from the crafting menu - A new character building that will allow you to create your first character without using the tutorial - Improvements for the character building, also, less rooms and time to craft items. - Changes for keyboard commands and chat Some of you will notice that : - The first menu displayed is still the dungeon menu. The ones available in the shop will be available at your character creation and some more will be available when the new character building opens. - Some levels can be easily solved, use the dungeon menu to save your progress. - The new tutorial will allow you to play some dungeon in a much more proper and fast way. - The character building will allow you to create a new character without entering the tutorial. Please, be aware that some of these changes are not made from scratch but they are adapted directly from patch 1.4, 1.5, 1.6 and the way it works in real life. The following video will explain you how to

Q: Trouble with obfuscation I am looking to obfuscate my JavaScript on the server side. I have the following for the server part # Run the Javascript if (IsDebugMode()){ @Write("~/Scripts/dummy.js"); } # Encode the templates \$obf = new iMatter.Obfuscation(); # Then the class \$templateCompiler = new iMatter.TemplateCompiler(); # and the JS (unobfuscated \$templateCompiler->Compile(\$statement); # and the data classes \$dataCompiler = new iMatter.DataCompiler(); # then we encode the templates into statements using obf->ToDynamo(Constants.OBF_ENCODING_JSON); obf->ToUses(Constants.USE_INFO_ZIPPED); // now, we use a second template compiler to the obf statement \$templateCompiler->Compile(obf->Encoded); Then I'll encode the statements (obfuscated) to a JSON string and send over network. My client side code looks like this: var templates = \$("#compiledTemplate").
