Keyman allows the user to type in Tamil as well as English. The Keyman software is composed of 5 layers: Master, Effects, KeyBoard, Keyboard and View. The master layer is responsible for the mapping between the keyboard and the keyboard layout. The key mapping of the keyboard is managed by the keyboard layer. In order to type Tamil letters, the user needs to select a keyboard. The keyboard is basically an alternative to the standard keyboard. This layer is not a part of keyman and it is required to install. From the Effect layer, the user can find the effects of the keyman software. Keyman provides a collection of the standard effects found in most of the text editing software. These effects are: Undo, Redo, Bold, Italic, Underline, Align Left, Align Center, Align Right, Bold Italic, Underline Align Left, Underline Align Center, Underline Align Right, Color Selection, Font Size Selection. It provides a variety of features like: the shortcut key combinations for undoing and redoing the last operation. The user can change the color theme of the software. Many people can use it as it is a free software.
